

To: U.S. District Court
 From: William F. Davis III
 re: medical complaint statement 04-209

I William F. Davis III (Plaintiff) was diagnosed with two ventral hernias on May 22, 2002. By Dr. Ina. Who had seen me. and given me a hernia belt. Then referred me to Dr. Robinson who had ran some test. After about a week of nausea in pain I was returned for more test. which determined. I had a inflamed pancreas.

It wasnt until June 6, 2002 that I was committed to the infirmary at Howard Young Correctional Center in Wilmington, Delaware. During my stay in the infirmary I lost considerable weight. They ordered me ensure for three $1\frac{1}{2}$ months nurse Betty was my nurse, and she said that "I am not going to the hospital because she thought it wasnt that serious". The first Correctional medical staff that was there at the time on [Sept. 25] 2002 I went thru

Sept. 5

Surgery. And it was determined by the surgeon, Dr. Mamon that the feces present in my intestine was deadly, and if not taken care of immediately then it could have resulted in my death.

yours truly
